

YOUR WINDOW TO PROTECTION

AND BEAUTY

LLumar[®]
WINDOW FILM

GRAFFITI PROTECTION

Retailers have also found that store front glass exterior signs, poles and other vulnerable architectural elements at the location can be protected from graffiti artists, eliminating costly replacement through the installation of LLumar graffiti film. Interior display cases, as well as bathroom mirrors and stalls, are also vulnerable to scratching and marking by vandals' swift tools. LLumar graffiti film is clear so vandals' don't know it is protecting your facility.

The key to your window of protection and beauty lies within your LLumar dealer.

Please call **1800-2-LLUMAR** for a dealer near you. Or to learn more, please visit the LLUMAR website at: **www.llumar.com**

Join the thousands of retail management companies and storeowners nationwide who protect and enhance their merchandise and displays with the full complement of professionally installed LLumar Window Films. From fading and sun damage... to aesthetic enhancement and decoration... graffiti damage to safety and security, LLumar can provide protection that is invaluable to retailers.

SAFETY/SECURITY ASSURANCE

If your retail location is in a high crime area or if you have concerns about severe hurricanes, the threat of earthquake or bombing, LLumar can provide protection against these threats. LLumar Safety & Security Window Film acts as a deterrent to vandals in the event of a break in, but will also hold glass in place upon breakage, protecting occupants and merchandise from being hit with flying glass.

SUN DAMAGE/GLARE CONTROL

Unwanted glare, and harsh sunlight can often reverse the expensive and tedious efforts of window display designers from achieving maximum visibility for displays and fade merchandise in the process. Glare also prevents customers from clearly seeing beautiful merchandise from close-up or at a distance. LLumar's solar control window films cut glare while providing 99% UV rejection, helping to protect against fading without the use of costly and unsightly solar shades or blacking out the window. Virtually clear, your customers won't even know it's there!

AESTHETIC ENHANCEMENT

Easily hide unsightly electrical cords, up and down lighting fixtures, color gels or any other "unwanted" elements from display windows. LLumar decorative enhancement film is easily installed and removed to continually enhance your seasonal or special event display requirements.

Create decorative designs as vast as your imagination to enhance retail windows, doors, or interior displays. Replicate logos, architectural and display details... create designs that mimic your interiors, from lighting or floor detail, displays, and/or seating as often as you like. Any custom design can be created, or choose stock colors and designs as often as you change displays.

DECORATIVE DESIGN

ABOUT THE MANUFACTURER

LLumar® Window Film products are a result of a half-century of dedication to research, development and manufacturing by CPFilms Inc., the largest manufacturer of window films in the world. Unprecedented in the specialty films industry, CPFilms makes all components for its products in-house, having the widest array of technologies under one roof. CPFilms' 700,000 sq ft production facility in Martinsville VA, operates under strict quality systems that meet ISO 9001 quality standards.

CPFilms designs and manufactures specialty films for dozens of niche markets from aerospace to reprographics, photovoltaics, specialty packing and electronics, in addition to window film for residential, commercial, archival, security and automotive applications.

CPFilms Inc. is a wholly-owned subsidiary of Solutia Inc. in St Louis, MO, an international specialty chemical company with annual sales of over \$3 billion.

With over 300 products available there is a solution to every glass problem. LLumar is the leader in glass enhancement films.
